Take control of your *Smart Home* «

## FTW06 dS / FTW06 LCD dS

**FTW06 dS:** The room sensor is designed for detecting current room temperature and relative humidity.

**FTW06 LCD dS:** The room operating unit FTW06 LCD dS is designed for controlling fan coil units as well as detecting current room temperature and relative humidity. For a full utilisation of all available functions, the FTW06 LCD dS needs to be connected to the digitalSTROM-Meter dSM12.

The devices automatically provide relevant information to the digitalStrom system and take care of the climate control. In addition, all digitalSTROM components can be remotely controlled via your smartphone to make up for a comfortable room climate.

## BENEFITS AND HIGHLIGHTS.

- » Multiple design possibilities due to usage of standardised 55x55 switch frames
- » Communication over 230 V digitalSTROM powerline, no additional BUS wires required
- » Room climate control via digitalSTROM smartphone applications
